## MAJORCA STOCKS UP FOR THE SEASON

With holiday **bookings up 20%** and warnings that within weeks, Majorca could be almost sold out for the summer, preparations are under way.

Retailers and shipping companies claim they are getting ready for a bumper year thanks to the forecast tourism boom: **page 3**

## WINTER IS ON ITS WAY THIS WEEK!

### US WANTS A “STRONG UK IN STRONG EU”

**LONDON.** The US has a “profound interest in a strong UK staying in a very strong EU”, US Secretary of State John Kerry said yesterday.

Speaking in Germany, he said many Europeans felt “overwhelmed” by recent challenges but the US was confident Europe would “emerge stronger”.

His comments come ahead of a crucial Brussels summit, where Prime Minister David Cameron is hoping to secure a deal on a reformed EU.

An EU-exit group said the US stance on Britain leaving was “for US interests”.

Cameron, who was also in Germany, said changes he was seeking to UK membership would make Europe “more outward-looking, competitive and dynamic”.

He hopes to secure a package that he can recom-

mend to the British public, ahead of a referendum on whether the UK should stay in or leave the EU.

Kerry, who spoke about the EU while at security conference in Munich, said Europe was facing a number of challenges including the UK’s potential exit.

“Here again however, I want to express the confidence of President Obama and all of us in America that, just as it has so many times before, Europe is going to emerge stronger than ever, provided it stays united and builds common responses to these challenges,” he said.

“Now obviously, the United States has a profound interest in your success as we do in a very strong United Kingdom staying in a strong EU.”
